

# Model 274

## Ingot/Slab Handling Grab

This rack-and-pinion grab is designed to handle a wide range of ingots when in the horizontal position. Gripping force is applied through the legs by the tong action when an ingot is lifted. This unit is suitable for low-headroom operations. Grabs are custom designed per application.

### Product Features:

- Low-headroom design
- Replaceable wear plates
- Dual rack-and-pinion drive
- Grip force developed through tong geometry
- Includes slip clutch for drive protection
- Close tolerance machining for sliding arms
- Designed for ease of maintenance
- AC power

### Product Options:

- Powered rotation with or without stops
- Maximum open/minimum closed limit switches
- Integral weighing system
- Heavy-duty function indicator lights
- DC power
- Electrical reversing motor controls

 **ORDER TODAY!**

NOTE: To request a price quotation on your specific application, please fill in the Ingot/Slab Handling Application Evaluation on page 111 or online at: [www.caldwellinc.com/applications](http://www.caldwellinc.com/applications)

## Caldwell is your most complete lifting source

Get below-the-hook lifting devices and lifting points here
