

Model LPA

Locking Type

Model LPA is an ergonomic vertical lifting clamp capable of turning a single plate or member from horizontal to vertical through a 180° arc. It incorporates an auxiliary push button lock. Permits side loading of lifting shackle to 90° by de-rating of clamp's capacity. Refer to Figure 1 for de-rated capacities. The "Lock Open – Lock Closed" feature facilitates attaching and removing the clamp from the plate.

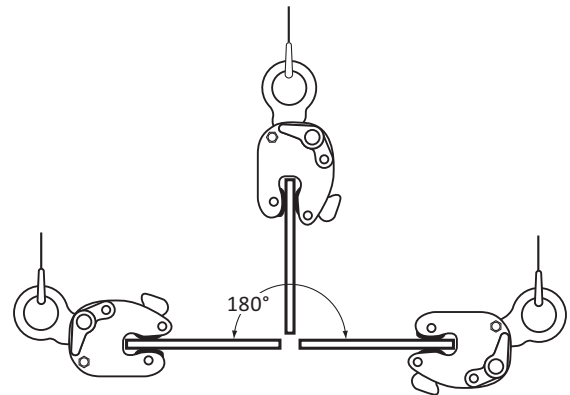

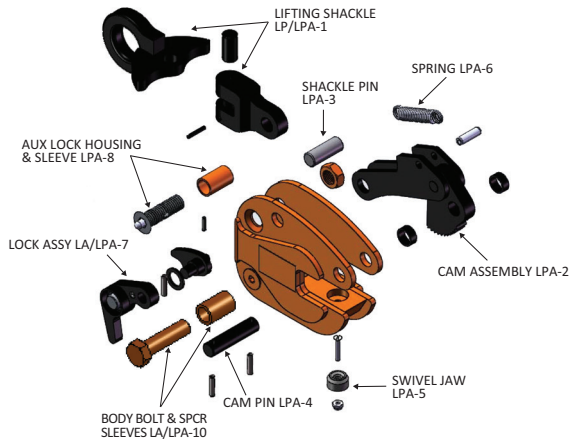

The Model LPA incorporates a pivoting shackle that permits side loading of the lifting shackle at 100% of rated capacity from vertical to 30°, 75% of rated capacity between 30° and 45°, and 50% of rated capacity between 45° and 90°. See Figure 1.

Lightweight version of the JPA with capacities up to 3 tons.
