

Model 281

Double-Rim Coil Tong/Grab

Automatic Double-Rim Coil Grabs are designed to handle light-gauge or highly finished coils when in the eye vertical position. The grab grips both walls of the coil when in the eye vertical position to minimize gripping pressure. Coil grabs are custom designed per application.

Product Features:

- Auto-latch mechanism for attach and release operation of grab
- Note: Hoist line must be slack to engage and disengage Auto-latch mechanism
- All pivot points furnished with hardened steel bushings/pins and lubrication fittings
- Handles a wide range of coil sizes and capacities
- Grip jaws conform to coil sizes

Product Options:

- Motorized grab
- Replaceable facing on grip jaws to protect coil

Meet Jay

When you are ready to start on building your Mill Duty coil lifter, Jay is ready to help. As one of our Technical Sales Reps, he is well versed in how your industry works and can help you create a custom lifter to replace an existing one that fits into your current process or help you outfit a whole new facility from the ground up.
