

Capacity ranges from 8,000 lb. at max spread and 15,800 lb. at min spread

Turn your fork truck into a crane!

Model AFB Adjustable Fork Lift Beam

You know a great idea when you see one. Caldwell's new Adjustable Fork Lift Beam is exactly that ... and so much more.

Turn your fork truck into a hard-working, adaptable lifter with this dream of a beam. Simply adjust the beam length, find your pick points, slide the forks into the fork pockets, and you're in business. And, if you like the idea, but want different spread or capacity min/max, give Caldwell a call – we can built to fit your requirements.

Product Features:

- Telescoping end tubes for spread adjustment via handles and retaining pins
- Spread position stencils to make adjustment easier
- Retaining pins go behind fork heel to secure an included pin storage feature
- Additional center lift point to increase potential usability with crane picks ... two lifters for the price of one!
- Swivel hooks included
- Can rest securely on ground when not in use to prevent unit damage and make it easier to access with forks
- Decals show capacities for adjustment positions and center lift point
- Min spread 144", max spread 240" with shackle holes every 6"
- Capacity ranges from 8,000 lb. at max spread and 15,800 lb. at min spread
- Weighs approximately 1010 lbs.
