

# Special Application Web Slings

## Single Leg Bridle Slings

**QUICKSHIP PROGRAM**

Webbing Bridle Slings are lightweight and easier to handle when compared to wire rope and chain bridle slings. High quality forged fittings are selected to match the webbing rated capacities. Webbing Bridle Slings help absorb shock and **do not conduct electricity**. Standard slings are available in single, double, triple, or quadruple leg designs. Webbing Bridle Slings are particularly useful when fixed lifting points are available.

### Single Leg Bridle Slings Type SOS

#### SPECIFICATIONS

Sling Width (in.)	Web Plies	Minimum Sling Length (ft.)	Rated Capacity (lbs.)		Sling Fitting Code		Model Number (specify length)
